

INNOVATIVE PROTECTIVE COATINGS

SIMIRON 860JF is a high performance, semi-rigid polyurea used for filling control and construction joints in concrete floors. Unlike many competitive products, this 100% Solids, VOC Free system features a fast-setting formula, provides excellent UV resistance, is moisture insensitive and offers a large shave-time window. 860JF supports and protects joint edges from heavy loads and wheel traffic, reducing spalling of the joint edges.

CUSTOM COLORS AVAILABLE
