Metallic

Simiron Metallic Additive is an exotic pigment system that can be added to Simiron clear epoxies. When dispersed within the coating, the pigment creates a beautiful three-dimensional appearance that gives the illusion of waves, swirls and ripples.

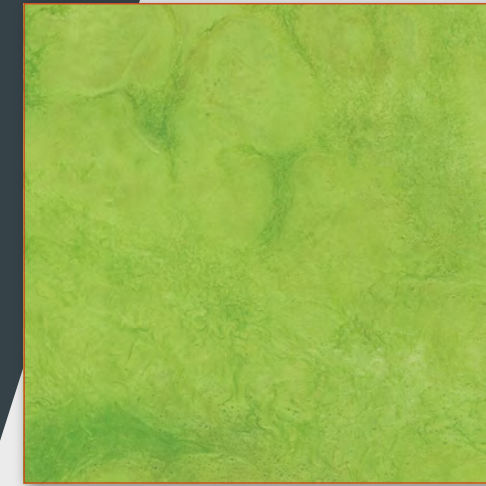

The finished appearance of the Metallic flooring system can vary from gradual, subtle changes in color to more distinctive effects. Each project is truly unique and colors can be combined to create a truly unique masterpiece.

Decorative Chip

Simiron Decorative Chip vinyl paint chipflakes are composed of water-based resin materials and contain high-quality additives and color pigments. The Decorative Chip Flakes are integrally colored and are produced in 1/8" and 1/4" sizes.

Decorative Chip Flakes are designed for use in commercial, industrial and residential flooring applications and are available in a wide range of colors and popular blends.

Easy to maintain and customize, Decorative Chip Flakes are an economical flooring solution that naturally hides concrete imperfections while enhancing and protecting any decor.
