SHOP FLOOR HIGH-GLOSS DURABLE EPOXY SYSTEM

Mechanics take automobiles apart; fluids end up on the floor and parts and tools are dropped. **SHOP FLOOR** is a 1/16" thick industry standard for protecting concrete in areas that need a tough work surface with slip-resistant texture. Our version locks in the broadcast with a polyaspartic, which provides UV stability for exposure through large, open garage doors and chemical resistance to oil, transmission, and brake fluids.

WASH BAYS

SIMCRETE SF URETHANE CEMENT

Detailers stand on floors that are constantly wet. **SIMCRETE SF** is a self-leveling urethane cement that is broadcast to rejection with silica sand to achieve a 1/4" heavy-duty system with a slip-resistant texture suited for wet environments. A polyaspartic is used to lock in the broadcast, which provides UV stability and resistance to any chemicals used to detail cars. The system can also withstand moisture vapor transmission.
